

What is Sepsis

Sepsis is when the body has a **bad** reaction to an infection

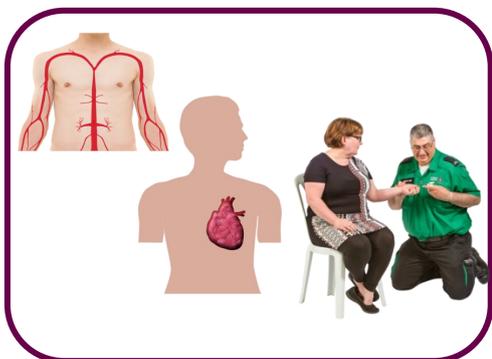

Sepsis can make you unwell very quickly

Sepsis can make you feel very hot and make you sweat

Sepsis can make you feel very cold and make you shiver

Sepsis can make your heart beat very fast even if you are just sitting still

Sepsis can make you feel out of breath

Sepsis can make you feel confused

Sepsis can make you feel sick and vomit

Sepsis can make you faint or collapse

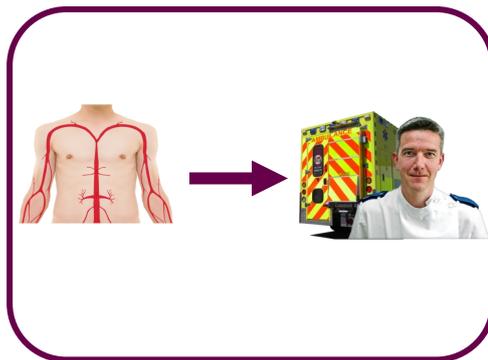

Sepsis can make you **not** go for a wee

If you are unwell or worried do **not** be afraid to talk to someone

If you think you have Sepsis ring 111 for the NHS

People need to go to hospital if they have Sepsis
